SUMMARY

Full-stack developer specializing in the MERN stack (MongoDB, Express.js, React, Node.js) and TypeScript, building production-ready web applications with AI-integrated features (Google Gemini API), real-time systems (Socket.io), and automated CI/CD deployment pipelines (Docker, GitHub Actions). Delivered 8+ full-stack applications end-to-end, from requirements gathering through deployment, across freelance and collaborative environments.

EDUCATION

Adama Science and Technology University (ASTU)

Adama, Ethiopia

Bachelor of Science in Electronics & Communication Engineering

2024 – Present

- 3rd Year. Relevant coursework: Computer Science Fundamentals, C++, Python, Data Structures

EXPERIENCE

Freelance Full Stack Developer

May 2025 – Present

Self-Employed

Remote

- Delivered 5 freelance web applications end-to-end, including 2 MERN e-commerce platforms with Stripe payment integration, 1 MERN booking system, and 2 responsive business landing pages with backend contact forms
- Managed the full client lifecycle — requirements gathering, project scoping, timeline estimation, delivery, and invoicing — as sole developer and point of contact
- Deployed and maintained production applications using Docker, Vercel, Render, and AWS S3, establishing reliable deployment workflows and hosting infrastructure

PROJECTS

ShipIt | *Real-Time Project Collaboration Tool*

shipit.gosagirma.me

- *React, TypeScript, Node.js, Socket.io, MongoDB, JWT, Google OAuth 2.0, Docker*
- Engineered real-time synchronization with Socket.io for a drag-and-drop Kanban board (dnd-kit), maintaining consistent state across concurrent multi-user updates with zero desync issues
- Implemented dual authentication (Google OAuth 2.0 and JWT) with role-based access control (invites, roles, join approval) enforced at the middleware level
- Designed read-state tracking to prevent duplicate notifications across concurrent active users

EchoStudy | *AI-Powered Study Hub*

echostudy.gosagirma.me

- *React, TypeScript, Node.js, MongoDB, Google Gemini API, Zod, Jest*
- Built an AI-powered study tool that converts uploaded PDFs and YouTube links into flashcards and summaries using the Google Gemini API, with Zod validation at every API boundary
- Designed a spaced-repetition scheduler that adapts review order based on per-card recall performance
- Achieved 85%+ Jest test coverage on the scheduling logic after a production bug prompted a full testing overhaul

WatchVault | *Cinematic Discovery Platform*

watchvault.gosagirma.me

- *React, Node.js, Express.js, Google Gemini API, TMDB API, Framer Motion*
- Built a movie discovery platform used by 350+ users, featuring a Gemini-powered recommendation engine that leverages TMDB data and individual user watchlists as context
- Implemented client-side search and filtering across a large movie dataset, delivering instant keystroke-level results
- Built a mobile-first UI with Framer Motion transitions tuned for small-screen interaction

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Shadcn/UI, Framer Motion, Responsive Design

Backend & Auth: Node.js, Express.js, RESTful APIs, Socket.io, JWT, Google OAuth 2.0, Zod

AI & Databases: Google Gemini API (AI integration, prompt design), MongoDB (data modeling), PostgreSQL, MySQL (familiar)

DevOps, Cloud & Testing: Docker, Git, GitHub Actions (CI/CD), Vercel, Render, AWS S3, Jest (unit & integration)

CS Fundamentals: Data Structures, Algorithms
